SUMMARY

Java/Kotlin Backend Developer with 3 years of professional experience. Proficient in designing and developing backend services, REST APIs, database solutions, and distributed systems. Currently looking for a software engineering position in Europe and open to relocation.

WORK EXPERIENCE

T-Bank

2023 — present

Java Developer

Saint Petersburg

Worked in the Core Automation team, responsible for developing products that automate internal business processes and employee workflows. Independently developed backend services and Spring Boot starters, covered them with unit and integration tests. On several projects, also took ownership of database schema design, API design, and business logic.

Auditor – a data reconciliation platform used by dozens of teams, performing over 500 daily reconciliations across multiple data sources (databases, S3, Kafka, etc.)

- Designed and implemented a configurable notification system for failed reconciliations via email and Slack. The solution eliminated the need for manual monitoring across dozens of teams and reduced incident response time.
- Added LDAP-based authentication and designed a role-based access control (RBAC) model for managing access to reconciliation configs.
- Extended reconciliation sources to include Kafka event streams and file storage accessible through the WebDAV protocol.

Spring Boot Starters for document management

- Independently developed several **Spring Boot starters**, including configurable APIs for document search, registration, and export to S3/Kafka, as well as a configurable data export starter for integration with external systems.
- These starters encapsulated all required business logic and could be configured through YAML files (database connections, Kafka topics, export parameters, etc.), allowing teams to deploy services without writing additional code. More than 10 services were successfully deployed based on these starters.

EDUCATION

ITMO University

2021 — 2026

Bachelor's Degree in Computer Science

Saint Petersburg

T-Education

2023

Backend Development in Java — intensive course on production-grade engineering

SKILLS

Java ecosystem: Java (primary), Kotlin, Spring Boot, Spring Web, Spring Security, Spring Data JPA, Spring AOP, Spring Kafka, Hibernate, JDBC, jOOQ, JUnit, Mockito, TestContainers

Build & DevOps: Maven, Gradle, Docker, Kubernetes, Git, GitLab, GitHub, Linux/Bash

Databases & messaging: PostgreSQL, Oracle Database, Kafka, Liquibase

Other languages: C/C++, Python

Languages: Russian — native; English — C1 (Advanced)

ACHIEVEMENTS

Huawei scholarship for academic performance at ITMO University

2022 — 2023

Winner of Yandex Algorithm Training 3.0 competition

2023
